General Introduction to Field Training

The College of Education at Qatar University is committed to provide high quality education that qualifies student teachers to take part in the development of the local and international communities. There is no doubt that the field training course is one of the most important courses that is considered a great opportunity for the student teachers to apply what they learned and acquired during their studies in the college in terms of knowledge, skills and attitudes in a practical way to prepare for their journey as teachers.

This Handbook provides an overview of the field training course in the College of Education, Qatar University (QU CEDU). The field training course provides opportunities to apply reflect, and develop the acquired knowledge and refine skills and attitudes in the classroom environment due to the increasing interest in training-based education and the acquisition of field-based training experience.

In all practicum experiences provided by the College of Education, the student teacher is joined to local schools, educational institutions or concerned bodies under the direct supervision of the mentor teacher. The student-teacher must complete the various activities through experiences that require reflection, thinking and application of the set of skills and knowledge that have been learned.

The following table shows the tasks of the field training course based on the learning outcomes of the College of Education within the conceptual framework, and its achievement of the national professional standards for teachers, it is important to note that the student teacher sgraduate with a first-level teacher license.

For more information about the teacher licensing policy, please see the following link:

http://www.edu.gov.ga/Ar/Documents/SEC2222016.pdf

National professional standards for teachers:

- 1. Planning for the development of students' performance and achievement
- 2. Engaging students in the learning proces and developing their learning.
- 3. providing a safe, supportive, and challenging learning environment
- Evaluating students' learning andusing evaluation data to improve their achievement

Demonstrating high quality professional practices and participation in the continuing professional development.

6. Maintaining an effective partnership with parents and the community.

Key Terminology

The Handbook shows basic information and guidelines for the student teacher to successfully plan and implement practical field experience. It is important to note that this manual shall be reviewed at the beginning and during the field training. The College of Education aims and expects the student teacher to become a professional educator who is able to facilitate the education process for students in the future.

The Handbook includes the terms whoe explnations are as follows:

- StudentTeacher :: .A male or female student of the College of Education enrolled in the field training course
- Mentor Teacher: The teacher who is selected according to an agreement between the College of Education and
 the selected schools, and whose mission is to direct and assist the student teacher during the field training
 period.
- University Supervisor: A faculty member who is appointed to supervise, assist, and: assess the performance
 of the student teacher.

The National Professional Standards for Teachers: the term "standard" is a phrase on which we can judge quality in the light of whatthe term describes with regards to what is expected in terms of skills, knowledge, tasks/assignments, situations, values and attitudes; or the ability to solve problems and take decisions necessary to the work of teachers and school leaders through their careers in schools.

Learning outcomes:

Seminar: the meetings of the university supervisor with the student teacher throughout the course.

Course Assignment Rubric/Matrix

During the field training period, the student-teacher accomplishes following tasks:

Lesson Plans	Lesson plans must be written and prepared by the student teacher for eachlesson -partially or wholly; - these lessons will be taught by the student teacher.
Reflection Journal	Writing a reflective journal for every week of field training. Seeinstructions provided in the appendix.
Class Notes	Follow class feedback guidelines . Seeinstructions and forms provided in the appendix.
Parent meeting report	Arranging a meeting with the parents of one of the students to fill out the form encloseed in the appendix.
Assessment Analysis	Complete the assessment/test analysis requirement as described in the Appendix.
Technology lesson	Planning and teaching one lesson to ensure that students' use of technology is central. (student must use technology to learn the concept or the skill to complete the lesson.
Teaching unit	Constructing a teaching unit out of the syllabus; see the instructions provided in the appendix.

جاممه مطر	
My tworeflection journals:mid & final	Two reflective journals must be submitted and they must demonstrate the student-teacher's progress in the field training- one of which is for mid-term assessment (fifth week); and the other is for final evaluation (tenth week). Both journals shall be presented in the week preceding the tripartite meeting . See the instructions provided in the appendix .
Mid-term & final evaluations	At the middle and end of the field training and student teaching tasks, assessment process must be completed using CEES form. The student teacher, mentor teacher, and university supervisor will discuss the student teacher's progress. See instructions and forms in the appendix (including teaching, research, and leadership)
E-Folio	A file that is created electronically on the Taskstream website and includes evidence of the student-teacher's achievements and his reflections on them, whether he achieved them in the field training course or in the previous courses.
Tasks file	A file that includes copies of all the daily and weekly tasks that the student teacher performs during the field training course, which must be updated on a daily basis and kept on a USB flash to be submitted at the end of the training period .
Assessment of the mentorteacher and the assessment of the university supervisor	The student teacher evaluates the university supervisor and the mentor teacher . See the forms included in the appendix . This item will be completed at the end of the semester and will be treated confidentially and without mentioning any names.
Action research	Student teacher conducts action research, writesan action research report according to the context of each school; this nincludes: definingresearch questions, reviewing previous studies, collecting and analyzing data, discussing the results obtained and clarifying how to apply the results to improve learning and teaching in each student teacher's classroom. The field training handbook includes the assessment rubric of the action research.

The reflective journal must be submitted weekly through the Blackboard to the university supervisor or to he email of the delegated supervisor.

It should be noted that all the above tasks must be received at the end of the training period, and it is necessary to provide a file for teaching plans and forms for the observations/notes of the university supervisor and thementor teacher.

All information must be up-to-date and available to the supervisor when attending to visit the student-teacher at school.

Tasks' Requirements for the field training course

The student-teacher must understand that field training is a compulsory university course in which he/she must pass and obtain at least grade C. As such, there are other tasks that must be completed. The following descriptions will help meet the field training requirements and help produce outstanding works that can be included in the E-folio and portfolio tasks

First: E-Folio: The creation of an E-folio on TaskStream is a compulsory requirement for all programs in the College of Education. This E-folio will consolidate student-teacher's professional experiences gained through teaching methods courses and field experiences, and it will demonstrate his competence in the chosen teaching profession. The student-teacher's E-folio will be evaluated /assessed at the end of the training period.

Second: Tasks' File: The student teacher prepares and updates the file, and ensures that the university supervisor is informed about it in each visit. This file will include the sections classified as follows:

- General information- includes items such as blank forms, information about the student teacher, and his class timetable.
- Feedback / Observation- The student teacher collects copies of all feedback forms during the field training period. Instructions and forms are included in the appendix.
- LessonPlans: The student teacher must use the lesson plan form/ template in the appendix of the Handbook for each lesson heteaches and for all lessons related to the tasks of the teaching unit plan. He should also make sure that the mentor teacher's signature is obtained for any lesson plan before adding it to the paper file. The lesson plans in this part are arranged in order from newest to oldest. Each plan must include a reflection that .can be written on the back of the lesson plan form or on a separate paper after teaching the lesson
- Assessment of mentor teacher / supervisor and feedback It is the student teacher's responsibility to urge the mentor teacher to evaluate and give written feedback whenever possible, at least once a week. The teacher mentor can use the forms (Observation of Class Performance and CEESs) attached to the appendix. The student-teacher keeps copies of theassessmentin his paper file. As for the original documents ,the mentor

teacher and the university supervisor will keep them. Further official assessments using the field experience assessment Form (CEES) will be conducted electronically at the middle and end of the field training.

- Reflection Journals (what and when): Studies confirm the importance of reflection, contemplation and meditation in developing the practices of educators in general, especially teachers. Hence, the tasks and responsibilities of field training require several types of reflection and contemplation, such as:
- a. After teaching the lesson, the student teacher reflects on his practice through the following questions:
 - What went well in the lesson, and why do you thinkit was done that way?
 - What can you do to improve the lesson next time?
 - How did you assess students' learning?
- b. Weekly Reflection Journal: the student teacher writes down views, and explanations related to field training events. Refer to the assessment rubric for the reflective journals in the appendix
- c. Midterm and Final Reflection journals: prior to the mentor teacher's and university supervisor's midterm and final assessments of a student's performance, the student teacher must complete self-assessments prior to meeting with them. See the forms in the appendix.

Third: Parent Meeting Report: In consultation with the mentor teacher, the student teacher sets a date and holds at least one meeting with the guardian. This meeting is documented in the parent meeting report form found in the appendix. The student-teacher also communicates with several parents and keeps a record of contacts with all parents, including the phone calls that were made (even the calls that you tried to make and the Informal conversations in the school hall, meetings, home visits and draft notes.). The appendix in the Handbook includes the communication log.

Fourth: The Teaching Unit

Preparing a study unit plan, consisting of all lesson plans and supporting materials. The aim of the unit is to develop rich and specific learning experiences and situations to teach students the targeted concept, skill, or strategy. It should include the use of technology for learning purposes and provide multiple opportunities for active student participation, differentiated teaching and assessment to enable different learners to succeed; the teaching unit includes the following details:

 The unit consists of a set of lessons whose sequence should be logical and appropriate to the concept, skill, or strategy.

The unit should include 3-5 lessons and reflectthe curriculum and subject matter presented; it should include the following:

- Introduction
- learning Outcomes
- Lesson plans including all the required details
- Lessons should vary according to the educational context. and Cognitive, emotional and skill goals should vary as wellThe objectives must also be linked to the learning outcomes that have been chosen, and the characteristics of the age group for which the unit has been prepared must be taken into consideration.
- The unit must include the teaching strategies that will be used in communicating information and experiences to learners. It is very important that teaching strategies and teaching methods vary in presenting the expected information, skills, and strategies.
- Employing diverse teaching aids and modern technologies in the teaching process
- Diversifying Assessment: including pre, structural, and final assessment. Assessment tools must be diversified
 (questions and practical and skill tests

Fifth: Field Training Seminar (See details in the course expectations section).

A weekly seminar is scheduled for group meeting between the student teacher and the university supervisor; the seminar includes topics that explain how to access resources, and deal with unexpected situations that arise during the field training period, and address

Qatar University procedures required as part of the graduation requirements.

Seminar Attendance:

The university believes that attending seminars is the student-teacher 's individual responsibility, and he isexpected to:

- Attending weekly seminars, which are scheduled by the university supervisor,
- Abiding by the time of attendance and leaving,
- Accomplishing all required tasks ,
- Optional meetings will be held to finalize the 2-3 requirements for the E-folio, work papers, and forms after completing the field training. The university rules regulating absence shall be followed, If absence from the seminar is necessary, the student teacher should, in this case, communicate with the university supervisor. See the attached "commitment letter", in case of non-compliance with that, a meeting shall be arranged with the student teacher to find out the reasons behind his absence or to cancel his field training.

The student teacher conducts action research and writes an action research report according to the context of each school; the report defines research question, literature review, and conducts data collection and analysis, discusses the results obtained, and explains how to apply the results to improve learning and teaching in each student teacher's classroom. The field training booklet includes the assessment rubric for the action research.

Responsibilities and Tasks of the Student Teacher:

After the student teacher' enrollment in the course, schools are determined in joint cooperation between the College of Education and the Ministry, taking into account that the student teacher is not entitled to communicate with a school or institution without the knowledge or approval of the College of Education, because it is necessary to sign an agreement with the school and explain the roles and responsibilities of all parties.

The following section presents a general framework for the development of student-teacher experiences during the field training course. This Handbook aims to focus on the skills learned during the teaching period of this course and to achieve integration between the learned knowledge and skills and the extent of their application in the classroom.

Field Training Period

The field training course in the College of Education lasts for a full semester andit includes:

- An orientation meeting (two hours) for all mentor teachers, university supervisors, and student teachers.
- Seminars (18 hours) to be held at the beginning of the semester before the start of practical course tasks
 in the school orinstitution. These introductory seminars aim to prepare the student teacher for the
 teaching experience and provide him with the forms and information necessary for field training.
- The period of teaching training at school is at least 300 hours, which often ends after 10 weeks; and the
 period can possiblly be extended to compensate for absence or permission cases.

The following timetable describes the activities in more details. During this period (10 weeks), the student teacher and the mentor teacher spend their time together in the class.

A weekly seminar is held for two hours (total of 20 hours).

Detailing the responsibilities and roles of the student teacher each week

The following sections explain the tasks of the field training course and the activities, where the responsibilities range from classroom observation and partial teaching to full teaching responsibility. Then, the student teacher's participation is reduced from full to partial teaching; after that, the mentor teacher becomes the main teacher in the class.

The first week: Observation, General assistance, and participation in planning and teaching

The student teacher will spend the first week observing the classroom environment, classroom management .techniques, instructional strategies, and assessment practicesThe student teacher is advised to attend and observe classes for different teachers in addition to the mentor teacher, (Observation samples are included in the appendix.

During this period, the student teacher should start writing his own notes (reflective journal) and ask the mentor teacher questions about his observations and conclusions after each class in order to reach the ultimate goal of improving students' understanding. These journals should focus on how to manage the classroom, use educational strategies, and assessment practices to improve the learning quality and develop the capabilities of the student teacher.

Among the main tasks carried out by the student teacher are:

- **a. Assistance:** These tasks support the role of the mentor teacher and help him recognize the progress of students and enable him to get to know them.
- Make sure students are present,
- Distributing papers or materials during educational activities,
- Assisting in correcting students' assignment,
- Monitoring students' work in their groups and providing individual support,
- Helping students who are late in their assignements and lessons.
 - b. Participation in planning: The field training period is a great opportunity for the student teacher to learn how to plan in school, whereby curriculum standards and unified models are used in all schools by the Ministry. However, each school has its own mechanisms of preparation and delegation of tasks. The student teacher assists thementor teacher and other colleagues in planning lessons. He takes initiatives and behaves positevely; and these are in fact leadership qualities that reflect professional commitment.

Co-Teaching: During the first week, it is not preferable to practice full teaching directly. However,

introducing the lesson, the end, or some short activities in the lesson are good ways to start getting to know the students and using the knowledge and skills of the student-teacher. Co-teaching allows student teacher to gain some experience with the support of a co-teacher. It also develops a professional relationship and cooperation between thementor teacher and the student teacher.

Second week: observation, general assistance, co-planning and teaching

It is expected in the second week that observations are completed. This week's observations will focus on assessment practices, both formative and final, and monitoring both class management and educational strategies in the lesson.

The most important tasks are summarized as follows:

- **a. Observation:** the observation in the second week focuses on all teaching tasks, including teaching strategies, classroom management and evaluation. You will find the observation forms in the appendices.
- **b. Assistance**: continuing the above-indicated tasks in the first week; more efforts and interaction with students are to be taken into account regarding their individual requests besides the collective work.
- **c. Co-planning:** continuing the joint planning, and involving partially in the planning of some short activities at the beginning or end of the class. The student-teacher discusses his plan and ideas with the mentor teacher and then he teaches the students.
- **d. Co-teaching:** continuing to participate in teaching while taking a larger role, not just working with one group of students; adding a part by repeating the same activity; or teaching the activity to another class if possible. The mentor teacher will determine the suitability of some tasks for you, knowing that he may hesitate to add tasks or pinpoint challenges early, so the student-teacher must be an enthusiastic initiator ready without affecting the tasks of the mentor teacher and his responsibilities towards the class and the school.

Third and fourth weeks: observation, public participation, co-planning, independent planning, observation, co-teaching, and independent teaching.

The activities during the third and fourth weeks tend to be more independent on the part of the students, but under the close supervision of the mentor teacher. In the fourth week, the student-teacher will take more responsibilities in preparation to start teaching in the fifth week.

- **a. Observation:** observations in the third week combine classroom management strategies with teaching strategies, and assessment practices in the same lesson. You will find the forms in the appendices.
- **b. Assistance**: in the third week, the tasks from the first and second week are continued and more interaction with students individually as well as collectively is added. By the end of the fourth week, the student-teacher should start teaching fully-all lessons, various classes and/or multiple subjects.
- **c. Co-planning and Independent Planning:** continuing to participate in planning, independent planning of the main activity of different subjects or classes, taking into account the policies of the school and the tasks of the

mentor teacher. The student-teacher should be ready in the fifth week to carry out the full teaching load.

- **d. Co-teaching and Independent Teaching:** contining to participate in teaching and increasing the independent learning experiences of the student-teacher in various ways, such as:
- Dividing the class into two groups so that both the student-teacher and the mentor teacher teach a group.
- Dividing the instructional time-so that the student-teacher or the mentor teacher introduces the lesson and demonstrates the skills, while the other person performs the practices and the assessment part of the lesson.
- One of the two persons presents the lesson content while the other supervises the collaborative work groups.
 During the independent teaching, the mentor teacher should be present in the same room, but as an observer, and not as a co-teacher.

Weeks 5-9: Full Responsibility for Teaching:

The period of taking full responsibility for teaching begins in the fifth week and lasts until the ninth week. The gradual increase in teaching activities has led to such an extent that the student-teacher assumes full responsibility according to the teaching load of each subject. The responsibility includes the planning and teaching as an ordinary class teacher in addition to II other tasks associated with teaching. The mentor teacher will follow the plans of the student-teacher, observce how to teach, provide feedback to improve the work.

Week 10: Reducing Responsibilities

During the last week, a gradual withdrawal from teaching tasks is carried out. The mentor teacher will resume responsibility for teaching throughout the week until he returns to the position of the main teacher. The student-teacher should continue to help and observe until the end of the week.

Note: the following table shows the list of tasks for the student-teacher during the semester. **The forms are in the attached appendices at the end of this manual.** Any modifications made by the student-teacher should be discussed first with the mentor teacher and the university supervisor.

Timetable detailing the responsibilities and roles of the student teacher each week

The week	Suggested tasks
Two weeks before	- Course Seminar
joining school	- Introductory meeting (Orientation)
Week 1	- Observing different lessons and criticizing them
	- Assisting the teacher during teaching -(individual teachingor teaching
	small groups)
	- Joint planning (teamwork, if available) with the mentor teacher

	- Reflective journal				
Week 2	- Joint planning with the mentor teacher (team work)				
	- Partial teaching				
	- Full teaching				
	 Observing different lessons and criticizing them 				
	- Reflective journal				
Week 3	- Joint planning with the teacher (team work)				
	- Partial teaching				
	- Holistic teaching				
	- Class observation				
	- Reflective journal				
Week 4	- Joint planning with the teacher (team work)				
	- Part-time teaching				
	- Complete individual planning of lessons and their implementation				
	- Class observation				
	- Reflective journal				
Week 5-9	 Teaching full teacher quorum with individual planning 				
	- Reflective journal				
	- Course tasks				
Week 10	- Assist the teacher in teaching (individual or small groups)				
	Complete planning and implementation of two lessons				
	- Class observation				
	- Reflective journal				
11 th week	- Make up for absences and hand over all tasks				

Course expectations

The course tasks have been clarified through the previous sections and items, and here is an explanation of the most important expectations:

School schedule: -

During this 10-week period, the student teacher field training begins from the time teachers are required to arrive at school until they leave at the end of the school day- from Sunday to Thursday.

Student teachers are not allowed to leave the school during the school day or make any other arrangements without prior approval from the university supervisor and the field training unit. In the eventof sickness or any other forced absence, the student-teacher is responsible for informing the mentor teacher, the university supervisor, and the field training unit as soon as possible. Accordingly, contact details must be arranged with the mentor teacher, the university supervisor, and the field training unit, such as e-mail, phone, or SMS, at the beginning of the course.

Field Training Policies and Procedures:

Attendance

Since field training is a university course, and it is compulsory in the college programs, the attendance policy - including attending the seminar- is subject to QU attendance policy which is described in details in QU's Student Handbook.

During the period of school field training:

- Absence for three days due to illness or other urgent circumstances is allowed, provided that these days are compensated for in the eleventh week, i.e. after the end of the training period. Sick leave shall not exceed one week.
- In the event of permission, or late arrival to work as per the school schedule, time shall be compensated for if it exceeded 2 hours.
- In the event of serious sickness that necessitates absence for a larger number of days, the matter must be discussed with the university supervisor before the absence, if that is possible. Arrangements can be made to complete the field training taking into consideration the status of the student teacher. Absence for more than three days and without a medical excuse, the student teacher is considered to have failed the course because he exceeded the permissible period of absence.

Holidays and professional development days for teachers:

During the field training period, the student-teacher is committed to the holidays set by the Ministry, regardless of the holidays set by Qatar University. The student teacher is expected to be present in the professional development days for school staff and participate in the professional development programmes.

Written documentation of the student teacher's performance is essential and must be specific and systematic. It should include suggestions for improving performance. The College's supervisors and teaching mentors use the assessments' forms enclosed in the appendix to ensure a systematic written assessment. Several copies of the completed assessment forms of the university supervisor and mentor can be obtained and shared for discussion every week.

The university supervisor and mentor will complete different assessments of the student's general performance. An improvement assessment will take place in the middle of the field training semester in Week 5. If the accepted/targeted level is not achieved, a plan will be developed for the relevant student teacher in his presence, with the help of the mentor teacher, and university supervisor. The plan must be signed by all parties. This plan will serve as a guide to track improvement/progress during the second half of the field training. The final assessment/ evaluation will be presented in the 10^{th} week and discussed in the triple meeting.

The teacher mentor reviews, signs, writes the dates of both CEESs, and ensured that they are also signed by the evaluaters/assessors. These forms are added to the file and sent to the program office after completing all signatures.

The student teacher, university supervisor, and teacher mentor are all required to to provide information about the strengths and weaknesses of the teacher preparation program. Assessment forms of the university supervisor and teacher mentor will be available during the seminar held at the end of the semester, taking into account the following points:

- 1. The student's grades in school are the responsibility of the university supervisor in charge of overseeing the student teacher in the school
- 2. In the event that there is a conflict of score evaluation of the university supervisor, the teacher mentor, and the school administration, the student teacher will be evaluated by a special committee formed by the College of Education. The evaluation score approved by the assigned committee will be counted.
- 3. If the supervisor did not notice any progress in the student-teacher's performance two weeks prior to the end of field training, the student will be evaluated by a special committee formed by the College of Education, the evaluation scores of the committee will be approved.

The student teacher is not entitled to object the result of his/her evaluation.

Reassignment or withdrawal from field training

The student-teacher must cooperate and respect the university and the school's regulations as well as the ethical code of educators' profession. If the student-teacher faces challenges during the semester, there are certain procedures and practices that can provide options and alternatives.

The student- teacher can discuss and study the matter with the mentor teacher and the university-supervisor; it is necessary to document the meeting and what has been agreed upon; if no solution is reached, and based on the special case of each week, the following decisions may be taken:

- a. The student-teacher may be assigned to another class for the remainder of the semester, and may also be reassigned to another school.
- b. In the event that the student teacher does not comply with the instructions of the school and the unit, and the midterm performance evaluation is less than acceptable, the student-teacher is deprived of completing the field training and is not entitled to request a transfer to another school.
- c. Withdrawal is poosible with the option that the student can repeat the field training course in the following semester.
- d. Field training can be stopped with an "incomplete" grade, according to the university's schedule and instructions. If the student completes the field training requirements, the "incomplete" grade can be changed to the due grade.

The student teacher is sometimes unable to complete his field training for many reasons. In rare cases, the student teacher must be asked to leave the program permanently. Below are examples of situations in which such action may be taken.

a. If there is mutual consent and acceptance between the student teacher, the cooperating school, and the university supervisor for reasons of illness, harm, or the occurrence of an unexpected problem.

- b. If the student teacher is unable to establish and maintain a satisfactory standard of classroom teaching and management, and this continues despite repeated meetings and support from the teacher mentor and university supervisor.
- c. If the student teacher does not abide by the policies of the cooperating school.
- d. If the student teacher demonstrates unprofessional conduct towards supervisors, school staff, or students.

In the event that the study of the student teacher in the field training course is suspended, specific policies and procedures will be taken to end the process. Details of the process are summarized in the QU Student Handbook.

Student teacher Responsibilities

These items are basic tips and guidelines for the mentor teacher, please focus on them, especially as they help the student-teacher to understand his priorities.

Commitment:

- Giving fieldt raining top priority in the classroom.
- Coming to school on time and stay until the end of the school day .

Organization:

- Submit the weekly teaching schedual to the university supervisor, provided that you inform him about any changes that may occur. (Appendix)
- Inform the school, the mentor teacher, and the supervisor as soon as possible in case absence is necessary due to sickness.

Preparation:

- Provide the mentor teacher with copies of your written lesson plans two days in advance of the scheduled teaching time.
- Prepare all teaching materials and teaching techniques in advance to avoid waste of time or student misconduct.
- Read various sources of educational materials that go beyond the syllabus to enrich the lesson .
- Plan the most effective ways to implement the classroom procedures and co-teaching between you and the mentor teacher.

Make teaching style flexible by planning for interruptions or time constraints,.

Teaching:

- Understand the main principles and concepts of the teaching material to ensure higher levels of teaching efficiency.
- Arrange the learning events sequencially to reinforce student understanding.
- Monitor the behavior and learning styles of students coming from multiple cultures to create a classroom atmosphere that promotes multicultural understanding.
- Introduce a variety of teaching methods to provide individualized learning styles and to better develop research and problem-solving skills.
- Be able to create and use instructional materials and technologies that are in line with the students' level of development.
- Provide directions in a clear and sequential manner.
- Develop critical thinking through the use of high-level questions.
- Choose a variety of assessment tools and teach students to use self-assessment.
- Provide lesson activities that require collaboration and teamwork.
- Encourage creativity through student ideas to enrich class experiences.

Relations with students:

- Create and maintain a rewarding learning environment by showing respect for all students.
- Develop a specific plan with the mentor teacher that complements your current program and your strengths as a new teacher. Remain firm and friendly in your relationships with each student.
- Understand the students' social and emotional needs.
- Be a listener and respectful to others.

Research:

- Be aware of opportunities to engage in discussions with other teachers about the teaching profession.
- Be aware of current research in the field of education that interests you.
- Be aware of opportunities that increase student learning beyond the classroom and that is extended into the local community.
- Try c onstantly to add new research-based teaching methods to the educational portfolio.

- Be aware of developments in formative and summative assessment methods and their effective applications in the classroom.
- Use the resources and be aware of the reference persons available in the school you are assigned to such as IT expert, librarian, nurse, school doctor, art and music teacher... etc.

Leadership:

- Wear appropriate professional attire.
- Welcome constructive suggestions and include them and incorporate them into the successive stages of planning and education.
- · Be discreet about any confidential information.
- Learn about Qatari school institutions and programs by attending school and/or parents' meetings when appropriate.
- Attend all field training seminars.
- Collaborate with faculty members or student teachers in your building and exchange educational ideas, learning materials, and technology with them.
- Establish professional relationships by interacting with school staff and administrators, faculty, support staff, students, and parents.
- Be aware of school policies and procedures.
- Be involved in educational experiences that allow for a smooth transition from the student role to the class teacher role.

Mentor Teacher Responsibilities:

These items are basic tips and guidelines for the mentor teacher, please focus on them as they help the student teacher understand his priorities.

		. •	
Ded	п	cati	on:
			~

- Be friendly and professional with the student teacher.
- Complete your assessments and other work journals in a timely manner .

Orientation:

- Commit to attend the field orientation sessions of Qatar University with the student teacher.
- Instruct the student-teacher regarding:
- students.
- School schedule and daily schedule.
- Building facilities and resources.
- Staff, teachers and workers.
- The school's policy and applicable procedures
- The nature of the local community.
- Professional opportunities.

preparation

- Present a background students of the class to receive the student- teacher as a professional colleague.
- Prepare a place for the student -teacher, a desk, chair, shelves, and curriculum manuals .
- Discuss the assignment of the new student-teacher with the University supervisor and be sure to raise any concerns.

Teaching:

- Start introducing the teaching by developing appropriate planning and teaching as well as explaining
 and clarifying the purpose of the various instructional strategies.
- Present the methods and resources available for preparing daily lesson plans, provided that they are sequential and can be integrated into the content.
- Demonstrate how teachers' guides, curriculam manuals, and other sources are used in your class.
- Explain the classroom management philosophy and techniques, and how class management is maintained when you and the student teacher are in the classroom together.
- Choose a specific time to plan together on a daily / weekly basis.
- Describe record-keeping methods, attendence, grades, conduct, and all things the school requires.
- Explain safety and security procedures such as fire alarms, patients and quarells.

- Direct the student-teacher to be effective through:
 - Monitoring effective use of time.
 - Requesting to write study plans two days before the training date.
 - Creating a supportive environment that encourages inquiry and self-reflection.
 - Praising and encouragement.
 - Maintaining open channels of interaction and communication.
 - Discussing problems openly, one at a time.
 - Sharing professional experiences and educational materials.
 - Benefiting from the special interests, talents and abilities of the trainee in order to enrich the educational syllabus.
 - Encouraging the use of alternative educational and administrative techniques.
 - Directing acceptance of the multiple school duties and tasks that form the teacher's workload.
 - Allowing the trainee to assume full responsibility for teaching and management within the classroom for a period of not less than five weeks during the semester.
 - At some point during the student-teacher's time with you, provide some specific instructions on how to arrange class preparation since the beginning of the year.

Research/Scholarship

Assist the student- teacher to do research, develop, improve, and get acquainted with the best strategies and practicesthrough the following:

- Promote daily interactive discussions with your trainee that encourage reflection on the strengths and weaknesses of his/her effectiveness in the planning and teaching process.
- Help the student-teacher inimplementing the recommendations received during the daily evaluation sessions.
- Constantly consult with the university professor; performance problems must be identified and discussed as soon as possible.
- Allow the trainee to save time to consult with the university supervisor after observation.
- Write assessments of student- teacher's development, and discuss them with him/her using the lesson observation form in the appendix.
- Discuss your observations with the student-teacher, and suggest to him / her some changes that might increase effectiveness.

- Participate in the triple assessment session with the student-teacher and the supervisor in midterm and final evaluations and other meetings.
- Use the weekly evaluation rubrics to support your assessments using the Field Experience
 Evaluation survey CEES for midterm, final, and tripple meetings.

Leadership

- Accept each trainee as an individual and refrain from comparing him/ her with previous studentteachers.
- Allow the trainee to go out to attend all required seminars that are part of his/ her field experience.
- Leave the student- teacher alone in class, so he can feel independent and have the
 opportunity to learn from his mistakes. Make sure this happens gradually and let him know
 where you are in case of any emergency.
- Introduce and inform the student-teacher about professional journals/magazines, resources and organizations.
- Involve the student-teacher in the meetings of the school body, the curriculum, and parents and teacher meetings when possible.

Responsibilities University Supervisor:

These items are basic tips and guidelines for the university supervisor, please focus on them, as they help the student - teacher understand his priorities

Dedication:

- Allocate sufficient time for observation work and feedback sessions
- Provide student with useful and constructive feedback.

Orientation and Organization:

- Inform the student teacher about method of communication you prefer.
- Visit the school to meet the mentor and administrators .
- Contact the student-teacher If you cannot set an appointment.
- Organize a complete collection of student- teacher's work, including the Field Experience
 Evaluation Survey (CEES).

 At the end of the field training semester, hand over all documents and forms to the field training unit coordinator.

Preparation:

- Meet the mentor before the start of the field training .
- Prepare a file of all forms and requirements that the student-teacher will need during the semester.
- Be aware of timetables for university forms due dates as well as assignment deadlines.
- Be familiar with the content of the Field Training Handbook.

Teaching:

- Participate in mentoring the student-teacher at the beginning of the semester. These directives and
 instructions stress the responsibilities (academic, moral, ethical, and legal) and the information
 needed for a smooth transition from a university student to a successful teacher.
- Participate in directing mentors to provide information related to the program and required responsibilities, and to communicate effectively with the student teacher and university supervisor.
- Share information with student teachers about professional development opportunities in the local community.

Research:

- Monitor, evaluate and assess the student-teacher based on systematic considerations regarding teachingplanning, management, and professionalism.
- Guide student teachers' development of reflection and self-evaluation.
- Evaluate the student- teacher 's study plans and provide your written feedback.
- Accurately document any breaches of school or professional policy as well as any unsatisfactory progress in classroom instruction and management.
- Plan to intervene if there are problematic areas that need special attention. A copy of any plans
 resulting from the intervention must be provided to the Diploma Program Coordinator after all
 parties have signed the plan.
- Participate in the triple assessment session (for at least 20 minutes) with the student-teacher,
 and the mentor in the mid and final evaluation of the field training.
- Complete the mid and final evaluations with the mentor for every student-teacher and write recommendations and/ or summaries.

• Evaluate/assess the entire electronic file.

Leadership:

- Continue your professional development by reading professional journals and attending conferences.
- Be an assistant for the field training supervisor if requested.
- Communicate regularly with the Program Coordinator on areas of mutual interest or suggest specific changes to the program.
- Be the link between the student-teacher and the College of Education at Qatar University (This
 includes communication with the school principals, mentors, thestudent teacher, and the field
 training coordinator.)
- Help the student-teacher to be considered and included in In the next semester's timetable by making suggestions or recommendations.
- Complete letters of recommendation for student-teachers who are applying for initial teaching positions.

Appendices

Appendix (1)

A Circular about Regular Attendnce of BA. Students in the Field Training Course in the Physical Education Major, College of Education

During the semester.....

The field training period is the basis for teachers' practical training and preparation. Thus, commitment to regular attendence is one of the main factors for qualifying competent teachers.

Therefore, we would like to inform you of the following:

- The field training period starts on...... and ends on
- Absence from field training is not allowed unless an acceptable excuse is provided for a period of 3 days only.
 The absence period must be compensated at the end of the field training (in the 11th week)
- In the event that the absence exceeds 3 days, the student is given a (fail) grade.
- In the event of emergent cases of sickness that require healthcare reservation, the student who, has
 medical reports documented by Hamad Corporation is allowed to be absent for a period of 7 days from the field
 training; this period must be compensated after field training (in the 11th week).
- The permitted hours and late attendence rime must be compensated (in the 11th week) if the time exceeds two hours during the ten-week period (the full training period) .
- In the event that you are absent 25% of the seminar hours, half of the grade will be counted for you, and if absence exceeds that time, you will be given the grade (zero).

We hope that everyone abides by the above rules.

Guidelines and forms related to the student teacher's observation of other teachers (Used when observing other classes)

Task 1: Observing classroom management in Physical Education or other courses

The student is required in this task to view some of the lessons implemented by the mentor teacher or other teachers in the school who teach other subjects, he can write his observations about the teacher's classroom management. The student should focus on the following main aspects of classroom management:

- 1) Organizing the classroom environment or (the sports hall)
- 2) Time management
- 3) class interaction

The student teacher must observe these main components of classroom management and use his observation to answer the following questions:

First: Regarding the organization of the classroom environment or the class hall:

How does the classroom environment or class hall look like? Have the arrangement of the sports tool and materials (required for the lesson) been organized and placed in an effective manner? Have the activities or tools been distributed and arranged in the classroom according to the different parts of the lesson? Are there sufficient numbers of sports activities or tools that suit the number of students and the various training activities?

Second: Regarding Time Management

When did the teacher start the lesson? Was the time allocated appropriately to the different parts of the lesson? Is there a sort of time wasting in some parts of the lesson at the expense of other parts? Is the teacher committed to the start and end times of the class? Is the class time used for teaching and learning or other aspects unrelated to the lesson?

Third: Classromm Interaction

How does the teacher interact with the students? How do students interact with each other? Does the teacher allow

Themes of Class Management	Suggestions
Organizing the sports hall	
Time Management	
Classromm Interaction	

students to ask and answer questions? How does the teacher deal with the students' various behaviors? What type of punishment is used to deal with students' behavior? How does the teacher motivate students and push them to participate in the class?

Application: After observing examples of classroom management for teachers, think how you can manage your classroom in a successful way? and then, write certain suggestions that you expect to implement to ensure the success of your classroom management according to the three following factors:

Task 2: Observing instructional strategies:

The student teacher is expected to carry out this task by observing the lessons taught by the mentor teacher and focusing on the teaching strategies, and he can carry out the task with the help of answering the following questions:

What type of educational strategies are used? How were the educational strategies applied in the lesson? Is the teacher or the student responsible for the main role in applying the educational strategies used? Are there various educational strategies? Are the strategies used well-matched with the available tools and capabilities?

Do the used instructional strategies consider students' individual difference?

In observing instructional strategies, the focus should be on lesson structure and how students participate in the lesson.

Application: Choose at least one instructional strategy that you will use, and write a progress report on it according to the following elements (to be submitted during the seminar):

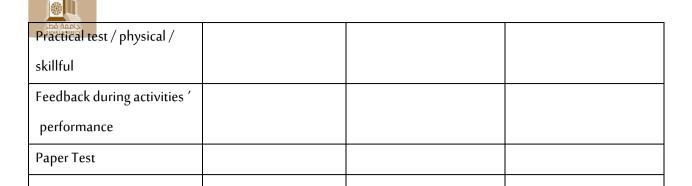

Strategy Name	Justification for apllying	How to employ it in the	How it considers students'
	it	Physical Education	individual differences
		Lesson	

Task 3: Observation of Assessment Practices

Description: In this task, it is important to observe the assessment practices applied by the mentor in the teaching sessions; the assessment is divided into two types: formative assessment (which takes place during the session), and final assessment (which takes place at the end of the session). As a student teacher, you are required to observe the teacher's performance to make sure that students have undrstood the subject matter of the lesson during or at the end of the class. you are also required toidentify the type of assessment practice used by the teacher, whether during the implementation of the lesson or at the end of the lesson, by writing the sign (......) in front of the type of the assessment used according to the following table:

Assessment Practices	formative Assessment	Finak Assessment	Notes
Performance Observation			
Asking questions

Field	Performance Standards	Indicators
planning	The lesson plan is available and its items are completed, appropriate and announced	 Available with the teacher in the classroom. Consistent with the semester plan. Written in proper language and characterized by accuracy and clarity The introduction is available and related to the topic and objectives of the lesson. Determining the mechanism of employing the key and supportive learning resource and teaching aids teaching methods and strategies are varied Determining integration with other materials clearly and appropriately Value education and family culture are linked to the objectives and topic of the lesson. Closing/concluding the lesson is appropriate to the topic and objectives Selecting appropriate and varied assessment methods Sharing the plan on the subject website and post it on the class website in case the school uses lesson planner. Uploading the plan to the content depository and sharing the educational resources on the classroom website if the school relied on the content depository.
	Learning objectives are appropriate, well-formulated, and measurable	 Derived from the standards correctly It is relevant to the topic of the lesson, including the knowledge and skills it includes.

	 It was drafted in a clear and procedural manner Considering diversity between cognitive and skill levels. It can be achieved -; its achievement can be measured at the time of the class.
The main lesson activities are clear, gradual, and linked to objectives.	 Activities are relevant to the objectives of the lesson and can help achieve them. Taking into account the gradual and sequencial process in achieving the objectives of the lesson. The main activities clarify the roles of both the teacher and the student. The main activitiespromote key competencies and values within the cognitive context. Clearly taking into account individual differences among students Time distribution is specific and appropriate for the activities. Clarifying the mechanism of employing technology tools in the role of the teacher or the learner, if any.

Field	Performance Standards	Indicators
esson implementation	Learning objectives are presented and discussed.	 The teacher reviews the lesson's planned objectives at the beginning in a clear and appropriate manner. Verifying the clarity of the lesson objectives to the students.
Lesson in	Introductory activities are activated appropriately.	Carried out in an attractive and interesting way.Introducing and relating to the main activities.

	Implemented within the specified time.It relates to students' life experiences and past experiences.
- The content of the lesson is clear and the presentation is organized and coherent.	 The content of the lesson is presented in a clear manner The content is presented in a gradual and organized way, with sufficient examples The steps of implementing the lesson are interrelated and relevant to the objectives. Related to environment and life experiences.
Teaching methods and strategies are diverse and student-centered.	 Commitment to applying teaching strategies that suit the objectives of the lesson and take into account the learners. Emplementing the strategy properly according to the lesson plan,. The implemented strategies are diverse and challenging; they enable students to demonstrate their ability to learn and achieve.
The main and supporting learning resources are employed in a clear and correct manner.	 Employing the main learning resource in a clear and correct .manner Employing paper support sources that enrich the lesson and help achieve its objectives. -Posting electronic support learning resources for the subject Ensuring thatstudents use learning resources during the lesson Optimal use of various learning resources to consider individual differences among students.
Teaching aids and technology are appropriately employed.	 Using various effective teaching aids Employing technology to serve the educational situation and goals. Organizing the -board display

		Activating the interactive board or interactive projector to serve the educational situation.
for	ne class questions are well- rmulated, progressive, and ought-provoking	 Clear and well—written. Diverse and gradual Attracting students' interest and motivating them to participate and ask questions. promoting dialogue and discussion between the student and teacherand among all students. stimulating thinking and challenge among student,
	ne syllabus content is curate and appropriate.	 The -syllabus content is compatible with the source of learning, and is linked to the objectives of the lesson. The -syllabus content presented is correct and sound and is free fromknowledge-wise and linguistic errors. Clarity of the syllabus content and the appropriateness of its terminology for the school stage. The enriching learning material is based on reliable references.
em	ey competencies are nbedded in the cognitive ontext of the lesson	 Teachers provide activities within the context of the lesson that include the following: Students were able to suggest alternatives and produce ideas in innovative ways. Students develop their language skills and employ them in expressing opinions and ideas. Students develop their numerical skills and employ them in a variety of situations. Students were able to communicate (listening, speaking and writing) they could use these language skills in various purposes .

Core values are included in the cognitive context of the lesson	 Collaborative work, self-respect, and acceptance of positive change Interest in investigation and the use of technology in the preparation and sharing of research. Identifying problems and cooperating with others in proposing - solutions Teachersprovide activities within the context of the lesson that include the following: Students' pride in Arabic language, Qatari history and traditions. Students respect others and value themselves. Students' confidence in their ability to learn and to make an effort to do so. Students' commitment to their rights and duties. Develop students' healthy lifestyles.
Integration between the themes of the learning material (subject) and other materials (subjects) is done appropriately.	- Linking subject themes with its skills effectively Employing integration with other subjects to achieve students' cognitive growth.
Individual differences among students are taken into account.	 Distributing students in an appropriate manner according to their levels and the activity carried out. Providing activities and training that take into account individual differences Providing activities and learning stylesthat consider learning moded (audio, visual, kinesthetic,) The class teacher follows up on the materials provided by the support teacher to students.

	 Providing the necessary facilities and arrangements for students' support Employing technology in a manner that takes into account individual differences and students' support.
The lesson is ended/concluded appropriately.	 Concluding the lesson is appropriate and comprehensive, Concluding reflects the achievement of the lesson's objectives. The biggest role in closing is for students Concluding the lesson at the specified time.

Field	Performance Standards	Indicators
	Evaluation/assessment methods(prior, mid,	The evaluation is comprehensive, it included the objectives planned to be achieved. - Diversification of evaluation methods, taking into account individual differences among students. - Diversifying the use of evaluation tools to suit the educational
Calendar	and summative/final) are appropriate and varied.	situation (teacher's observation - self-assessment — cognitive and oral tests - oral questions - electronic application - electronic discussion) - The evaluation process continues before, during and after the lesson (pre-mid-final). - Diversity in patterns/modes and levels of questions included in the assessments and electronic worksheets.

Feedback is varied and .continuous	 Diversifying feedback methods to suit learners)immediate/delayed verbal/written) Comprehensiveness and continuity of feedback, so that it includes all stages of the lesson and all learners of different educational, cognitive, age levels. Evaluating and discussing students' answers (correct and false), and linking their answers to their previous knowledge. Encouraging students to submit logical explanations, supporting their answers and statements by texts, examples, or data. Stimulating students to evaluate their own responses/feedback.
Students' works are followed up and corrected accurately, both on paper and electronically (LMS).	 Providing the necessary instructions for students to complete written work accurately and clearly, and ensure their understanding. Regular follow-up and evaluation of students' work, whether paper or electronicLMS. Accuracy in correcting written work and directing appropriate feedback Announcing paper or electronic assignments and tests to students and parents periodically.

	General Guidelines for Mid. & Summative Term Assessment

Name:	Date:
Reflection Notes: please use t	the following questions to guide your reflection:

a. Mid-term Assessment:

- 1. What was the biggest challenge you faced during the first half of teaching students? Explain that.
- 2. Mention a positive event or a situation that you did not expect to happen during the first half of teaching students. Explain that.
- 3. List two areas that you want to improve during the second half of teaching students.
- a. First:
- b. Second:
- **4.** Mention one way/method that you would like the mentor to help you with , a method that he did not help you with previousely, and you want him (the teacher) to continue helping you with, explain:
- 5. Mention one method that you would like the supervisor to help you with, a method that he did not help you with previousely, and you want him (the spervisor) to continue helping you with, explain:

b. For the Final/Summative Assessment:

- 1. What was the biggest challenge you faced while teaching your students? Explain that.
- 2. In your opinion, what was the most successful aspect of teaching? Explain:
- 3. How has the field training experience changed your own attitudes and skills in the following areas?
- a. Learning support for all students
- b. Teaching
- c. Research
- d. Leadership

Evaluation/Assessment of the Field Training Performance - Physical Education

Trainee's Name
Student's registration number
Evaluator:
Self-assessment
Mentor
College supervisor
Evalautor' Name

Note: Please note that the successful completion of the field training requires that the trainee achieve a grade of (acceptable or more) in at least 7 out of 8 of the College L .earning Outcomes of the student achieves a lower level than that in the midterm evaluation, there must be a remedial plan that has been drafted and implemented, please attach this plan to the form.

Instructions

Please mark the number that matches your observations for each statement, then calculate the evaluation

pints together to obtain the full mark/grade. There is a conversion method of grades into percentage form 6).	I

Unacceptable = 1 Needs improvement = 2 Acceptable = 3 Targeted = 4 NA not applicable =							
First: Field of Teaching: Planning the teaching and Syllabus (subject content)							
		N.A	1	2	3	4	
1.	He plans to improve student performance and achievement						
2.	Formulates valid learning objectives that reflect the curriculum						
3.	Selects a set of learning resources that support the achievement						
	of the curriculum objectives						
4.	Uses student data to plan for improving their performance						
5.	Chooses flexible and innovative educational strategies and						
	activities						
6.	Plans learning experiences that demonstrate familiarity with the						
	concepts, strategies, and skills related to the practice of physical						
	and sports activities, and are consistent with the framework and						
	curricular standards of the State of Qatar.						
7.	Plans for sequential learning that effectively engages students						
	with concepts, strategies, and skills associated with physical and						
	athletic activities; To facilitate the process of empowering the						
	student with the competencies related to Physical Education						
	subject through the main themes: moving with perfection,						
	adopting healthy and safe patterns, and building character.						
8.	Plans sequential learning situations, involving learners in						
	investigating knowledge, concepts, strategies, and skills related to						
	physical and sports activities, positive participation in their						
	practice, and developing their level of understanding in order to						
	support the process of empowering students with the						
	competencies of Physical Education subject through the main						
	axes: moving with perfection, adopting healthy and safe						
	lifestyles, and building character.						

9.	,Sequential learning situations are plannedand thisrequire s			
	learners to show innovative and diverse forms of practicing			
	physical and sports activities that reflect the learners' acquisition			
	of Physical Education competencies through the main themes:			
	moving with perfection, adopting healthy and safe patterns, and			
	building character.			
10.	Plans sequential learning situations that use technology to			
	promote the development and acquisition of general and specific			
	competencies.			

Unacceptable = 1 Needs improvement = 2 Acceptable = 3 Targeted = 4 NA not applicable =						
Second:	Teaching and Learners Development					
		N.A	1	2	3	4
1.	He provides support to different groups of students (including					
	(gifted and talented students.					
2.	Engages students in active learning which includes					
	opportunities for challenge.					
3.	Uses a variety of supporting activities and learning resources.					
4.	Provides learning experiences that align with students' curricular					
	learning experiences					
5.	Develops students' reading, writing and arithmetic skills using					
	physical activities					
6.	Develops students as independent learners					
7.	Develops students' higher order thinking skills					
8.	Facilitate collaborative and interdisciplinary learning					
	environments.					
9.	Involves students in the use of concepts, strategies, and skills					
	associated with Physical Education , & physical activities, and					
	sports.					
10.	Involves students in a variety of forms to practice various					
	physical activities and sports (football, basketball, athletics etc ,.)					
11.	Involves students in conducting investigations in Physical					
	Education.					
12.	Defines gym routines and high standards of behavior to support					
	learning.					
13.	Encourages students to take initiative and responsibility for their					
	own behavior and learning.					
14.	Students are encouraged to respect themselves and others.					

15.	Uses knowledge of concepts, strategies, and skills associated with			
	physical activities, sports, and learning requirements to enable			
	pedagogical competencies; to plan and implement appropriate			
	teaching methods that guarantee fair educational opportunities			
	in Physical Education .			
16.	Designs and implements educational experiences that involve			
	learners in practicing physical and sports activities and hel them			
	acquire various general and specific competencies in Physical			
	Education which are in alignment with the Qatari national			
	curricula standards.			
17.	He applies / uses the most important theories and concepts			
	related to the subject he teaches.			
18.	Takes into account individual differences to promote successful			
	learning experiences for all students.			
19.	Uses the latest learning resources in effective ways to improve			
	the educational process.			

Unacceptable = 1 Needs improvement = 2 Acceptable = 3 Targeted = 4 NA not applicable =						
Third: Evaluation/Assessment						
		N.A	1	2	3	4
1.	Prepares and documents all types of evaluation.					
2.	Corrects Students' work is regularly.					
3.	Analyzes and uses assessment data to support learning.					
4.	Provides constructive feedback to students about their work and assessments.					
5.	Shares information about students with colleagues to support student learning.					
7.	Designs and implements a set of authentic (real)assessments that measure the extent to which students acquir e knowledge, concepts, strategies, and skills related to physical activity and sports activities, and thedegree of learners' development and mastery of each of the Physical Educations ubject's competencies through the subject themes: moving perfectly, adopting healthy and safe patterns, and building character, which shall be in line with all assessments adopted by the Qatar National Curriculum Standards. Uses theories and research to apply a variety of educational practices and real assessments that are characterized by specialized knowledge, and provide students with general and					
8.	specific competencies inPhysical Education. Uses evaluation data to guide decisions in the educational process and he reflects on students' learning outcomes related to knowledge, concepts, strategies and specialized skills, and students' achievement of general and specific competencies in Physical Education .					

9.	Employs self-assessment practices that support individual			
	learning outcomes related to acquiring knowledge, concepts,			
	strategies, and specialized skills, and empowers students with			
	general and specific competencies in Physical Education .			

Unaccept	Unacceptable = 1 Needs improvement = 2 Acceptable = 3 Targeted = 4 NA not applicable =							
Fourth:	Fourth: Professional Development							
		N.A	1	2	3	4		
1.	Reflects on professional practices to improve his performance							
2.	Works on self-development professionally and participates in							
	professional learning networks							
3.	Familiar with the developments of the subject matter and							
	educational principles							
4.	Demonstrates professional practices that reflect the impact of							
	professional development on his performance							
5.	Carries out required duties and responsibilities							
6.	Adheres to the laws and policies of the Ministry of Education and							
	Higher Education							
7.	Uses reflective practices for academic and professional self-							
	development							
8.	Demonstrates commitment to professional ethics and maintains							
	confidentiality and integrity							
9.	Takes the initiative to participate in new opportunities and tasks							
	for the purpose of professional development.							
10.	Appreciates cooperation with others during work in pursuit of							
	common goals							

Unaccept	Unacceptable = 1 Needs improvement = 2 Acceptable = 3 Targeted = 4 NA not applicable =						
Fifth: E	ffective P artnership with P arents and the Community						
		N.A	1	2	3	4	
1.	Communicates effectively with parents to improve student						
	learning and performance,						
2.	Uses local partnerships to support student learning and						
	performance,						
3.	Prepares students to become both local and global citizens,						

Unaccep	Unacceptable = 1 Needs improvement = 2 Acceptable = 3 Targeted = 4 NA not applicable =					
Sixth: Pr	ofessional Conducts					
		N.A	1	2	3	4
1.	Arrives on time,					
2.	Stays until the end of the school day					
3.	Notifies mentor and supervisor when absent,					
4.	Makes up the days of absence,					
5.	Wears ,appropriate sports clothing					
6.	Show readiness,					
7.	Shows positive behaviour,					
8.	Accepts responsibilities willingly,					
9.	Completes tasks as directed,					
10.	Asks for advice and/or feedback					
11.	Accepts feedback constructively					
12.	Shows respect to the mentor, students, parents and others , ,					
13.	Takes charge of routine tasks without repeating requests,					
14.	Completes routine papers on time,					

Unacceptable = 1 Needs improvement = 2 Acceptable = 3 Targeted = 4 NA not applicable =						
Seventh:	Research and Leadership					
		N.A	1	2	3	4
1.	Initiates positive change in education					
2.	Maintains high standards of content knowledge for all students					
3.	Realizes the importance of using challenging experiences to suit					
	students' individual differences and their learning and					
	developmental styles					
4.	Demonstrates the ability to adopt strategies that promote critical					
	thinking, creativity, and problem-solving					
5.	Shows a desire to adopt the most appropriate learning resources,					
	including technological ones					
6.	Appreciates the idea that safe learning environments stimulate					
	active learning					
7.	Demonstrates the ability to use multiple assessment methods to					
	support students' learning and to build on their results in future					
	teaching					
8.	Demonstrates ability to plan lessons that enable students to					
	achieve high learning goals					
9.	Shows the ability to solve problems and make appropriate					
	decisions					
10.	Reaches data-driven decisions by systematically examining a					
	variety of factors and resources					
11.	Participates in research activities by learning from and					
	contributing to the knowledge base in the field of education.

Guidelines for the weekly reflection journal

The reflection journal is a personal record and a place for observations, reflections, and questions. Your college supervisor should be available to comment on your observations and answer your questions. The supervisor can also help you learn how to go deeper with your teaching experience, by offering another point of view in some cases.

In writing the journal, you are not obliged to comment on every topic weekly, but you should be sure that you would be exposed to these topics constantly throughout the semester. A weekly journal should include comments on the following:

1. Personal thoughts and feelings about events and the educational environment. Examples of this:

- a. How did you feel when you started teaching students?
- b. Do you feel anxious and stressed even if you have some work experience?
- c. Were you satisfied or disappointed about a certain event this week?

2. Consistent, sequential and in-depth presentation of field experience throughout the semester.

Examples of this:

- a. What objective do you aim to improve in your plan?
- b. What specific actions have you taken or want to take this week?
- c. Have there been any cases that happened unexpectedly with students? How was your participation in it? What do you think about this case?

3. A range of experiences and perspectives on many aspects of teaching and learning. Examples of this:

- a. Did you expect before starting field training that changing some habits would be this difficult?
- b. What evidence of professionalism have you seen in your behavior and the behavior of your colleagues?

- 4. Numerous examples about confidentiality, ethics, respect for teaching as a profession. Why these qualities are necessary to reach a high level of professionalism? Examples of this:
- a. Has a student or colleague mentioned something to you in confidence and confidentially? How should you handle that information?
- b. Provide examples of your support for education and considering it as a profession.
- 5. Appreciate and demonstrate the need for personal and professional growth in the acquisition of skills, understanding, and professional competence. Examples of this:
- a. Have you participated in any professional development sessions this week? What was it about?
- b. Is there any topic in professional growth that you would like to learn more about? What is it?
- c. Do your professional growth needs change as you gain more experience as a teacher? Why do you think so?

Professionalism المهنية	There are serious errors in professionalism.	There are some errors in professionalism in several of the reflections; none serious.	Overall, the reflections exhibit high standards of confidentiality, ethics, and respect for teaching as a profession.	The entire set of reflections exhibits high standards of confidentiality, ethics, and respect for teaching as a profession.
Growth التطور	No professional growth is demonstrated. لا يوجد شرح للتطور.	There is some evidence of candidate growth in skill, understanding, or professionalism; however, it is not clearly demonstrated.	Overall, the reflections demonstrate candidate growth in skill, understanding, or professionalism.	The set of reflections clearly demonstrate candidate growth in skill, understanding, and professionalism.

Guidelines for the Technological Lesson Project TaskStream requirement

Overview

Technology provides a variety of tools to enhance teaching skills and clarify concepts. They are also valuable for students in the learning and teaching process. These two elements will be evaluated during the semester of teaching students by observing a lesson.

To meet the three requirements of this standard, the following must be completed acceptably:

- Demonstrating the appropriate use of technology in teaching.
- Demonstrating students 'appropriate use of technology for learning.
- Demonstrating awareness of appropriate technology to enhance learning by additional support students.

Task:

a. In one of the observations, technology that fits into the content, containing student interaction, should be integrated.

Examples of the appropriate use of interactive technology to enhance teaching:

- Physical Education Lesson: using programs to analyze games' strategies to develop skills concepts and strategies in sports activities.

Note: using a slideshow program (PowerPoint) during a lecture is not sufficient for this task.

b. In one of the views, integrate technology that enhances student learning and suits both the content and the level of the students.

Examples of the appropriate use of interactive technology to enhance learning:

- Physical Education: A student videos one of his colleagues, then he inserts the recorded video into a motion analysis software for getting observations on performance.

Note: using a slideshow program (PowerPoint) during a lecture is not sufficient for this task.

c. In your lesson plan, describe several types of assistive technology (from 3-5) that will enable the additional support student to enhance his learning.

Examples of appropriate technology to enhance student learning additional support:

- Students with certain injuries or movement problems to use one of the programs that enhances the motor awareness of some skills in sports.

Reflection discusses student learning.	student learning; may identify connections between technology	identifies ways in which technology affects learning.	Reflection focuses on student learning; clearly and insightfully identifies the ways in which technology interacts, enhances, or restricts learning.

Teaching Unit Guidelines

Requirement

Objective

The purpose of this activity is to assess the student's ability to design and implement a teaching unit for the content of Physical Education or one of the classrooms in light of the curriculum plan in force in the Ministry of Education and Higher Education in Qatar. The student is required to design and Implement an integrated teaching unit plan that includes at least 3-4 lessons and according to the content of the curriculum prescribed by the Ministry of Education and Higher Education in the State of Qatar. The unit must reflect the curriculum content, learning outcomes and curriculum competencies The aim of the unit is to develop rich and specific educational experiences and situations to teach students the concepts - skills - strategies and should include extensive use of technology for learning, multiple opportunities for active participation by students, and

carefully differentiated teaching and assessment to enable all learners to achieve success.

Details

- 1. The unit should consist of a set of sequential lessons that cover various topics within this concept.
- 2. The objectives of the unit should be in line with the established curriculum of the school and the subject taught.
- 3. The unit should take four (4) to six (6) time sets (classes) to teach.
- 4. Correction Standards for lesson plans and educational unit will be used to evaluate your work. Be sure to use them to get additional information on how to supplement your unit. The correct Standards can be found in the appendix.

Components required for the study unit

The unit plan includes the following components:

1- Introduction

Describe the study unit that you are designing breifly, its importance and the topics it addresses (the educational context - concepts - strategies - mathematical skills that you will design its teaching plans) and the curriculum competencies that you will develop (refer to the curriculum competencies in Qatar), the class, and the characteristics of taught students expected growth, the number of lessons (classes) it includes, and any other information relevant to the unit.

2- Learning Outcomes:

Determine the learning outcomes of the unit; it must be closely related to its content and express what students are expected to acquire by the end of their study of the unit. You should refer to the learning outcomes of physical education curricula in Qatar to choose the appropriate ones.

3- Learning Objectives

Developing a set of learning outcomes for the unit, which should reflect the expected learning outcomes for students to achieve after the end of their study of the unit. You must consider the appropriate way of drafting the learning outcomes and their diversity according to the areas of the three objectives: cognitive, motion (motor), emotional.

4- Lesson plan:

Design at least 3-4 physical education curriculum content for the class in which you will apply the unit using the lesson plan template approved by the Ministry of Education and Higher Education. Lessons must include all the elements included in the approved lesson plan, indicating in the plan the activities that will be applied to take into account the differentiation and diversity among students, and the employment of different learning strategies - applied activities - the available tools and resources and how to use them in teaching lessons. - How to employ technology in the class).

5- Evaluation:

Describe the various forms of assessment that you will use to achieve the specific learning objectives for each lesson, and you should diversify the assessment methods, such as theoretical and practical exams, etc.)

6- Self-reflections:

After completing the planning of the teaching unit and applying it in the mini-teaching within the school, write your reflections on it. And the following reflections must include an explanation of all the elements of the plan and the teaching position, and the reflections must include the following elements:

- Learning outcomes, objectives, and curriculum competencies: explain why you chose these
 outcomes, learning objectives, and curriculum competencies for the proposed unit, and how you will
 achieve them, then explain how you achieved them through the implementation of the proposed unit.
- **Teaching and educational activities**: Explain why you chose the teaching and learning activities (training and sports exercises) specified in the plan,; in other words, what was the reason that prompted you to choose those activities specifically, then explain how you applied them, what difficulties you encountered while applying them, and how you overcame them.
- Teaching and Learning Strategies: Explain the justifications for choosing some teaching and learning strategies, and how these strategies can contribute to achieving your goals, then explain what difficulties you encountered while applying these strategies, and what solutions are proposed to avoid them in the future.
- Class management and student interaction: Explain how you planned to manage your class during
 the period of designing the unit, then explain in detail how you applied your method of managing the
 class and what difficulties you encountered in that and how you overcame them as well, and you
 should explain how the students interacted with your teaching of the unit.
- Resources, activities and the use of technology: explain why you chose some sources in the design
 of the plan and how they helped you or did not help you in implementing the unit in reality, with the
 need to explain how technology was employed in the design or application of the unit.
- Diversity and differentiation among students: Explain how you took into account, during your
 planning for the unit, the individual differences among students, and how you implemented what you
 planned in this aspect, then explain the difficulties you encountered and the proposed solutions to
 them.
- Evaluation methods: Explain how you planned during your design of the unit to assess the
 achievement of your goals, and what you did during the application to ensure that you achieved the
 objectives set for the unit, mentioning the pros and cons of what you did during the evaluation.

Guidelines for Assessment Practices

Requirement

Introduction

This profession requires the student to conduct pre-tests (before the start of teaching) as well as post-tests (after applying the teaching) using various evaluation methods (paper tests - physical tests - skill tests) in order to know the impact of learning on students; to achieve this goal (the impact of Learning...), the results of the pre and post tests are compared, so that the difference in the results is considered as an evidence of the impact of teaching on student learning. The results obtained from the assessment analysis are used to design lessons in the future and improve skills in using different educational strategies.

The main purpose of this task is to collect and use assessment data to adapt and modify teaching methods and improve student learning.

Adaptations

This task should be adapted to students of different grade levels, educational contexts, sports and physical skills as well as the various cognitive aspects and individual differences among students.

Description

- 1. Select a set of 3-5 daily lessons on the same context concepts skills strategies.
- 2. Design tests (cognitive skill physical) to reflect what students should know, understand or apply at the end of this set of lessons.
- 3. Apply the tests before starting teaching and record their scores in a spreadsheet prepared for this purpose.
- 4. Record their scores for each test, as well as their total scores, (the pre-tests), when they have finished teaching the set of lessons, ask students to take the same tests, and record their new scores in the same way as in the pre-test phase.

Data Display

Use appropriate statistical methods (means - standard deviations - etc.) according to the nature of the test (cognitive - physical - skill), then present the pre and post results of the applied tests.

Analysis and Comparison

After obtaining the results of the tests, analyze them and compare between the pre and post tests, so that you can reach a scientific comparison that will benefit you in knowing the difference between the performance of students before and after teaching, and knowing the change between the results before and

after and whether the change is positive or negative. And you must determine the strengths and weaknesses of students in all applicable tests. The answer to all these points determines the effectiveness of your teaching and its impact on student learning.

Reflection

After analyzing the results of the pre and post tests, reflect on yourself so that you can answer the following two questions:

- 1. What did you learn about student learning by doing this activity?
- 2. How can you use this information to plan future lessons?

Action Research in Physical Education

General Description

This task requires that each student-teacher prepares and applies an action research that deals with an educational issue related to the teaching of physical education and any of the different sports fields and finds solutions to this issue. He can make use of specific research tools such as surveys, interviews, observation, tests and training programs. The research includes the following components: title of the research/project; summary of the idea of the research / project; introduction to the research / project, and its objectives; theoretical framework of the project / research; methods and procedures; data analysis; discussion and conclusions; Conclusion and recommendations; and finally a list of the references documented according to the American Psychological Association system (APA) — Presentation Syle - the general form of the research / project.

Task Values and Grading System

Each task during your field training has a value in the general average of the course, and the final score is calculated and introduced to you by the college supervisor.

Task	Percentage(%)	Maximum Marks
Parent meeting report	2%	5
Portfolio file and weekly journals	2%	6
Midterm and final journal report	5%	20
Teaching Unit	10%	36
Mid-term assessment of performance in field training	15%	متوسط من (4)
(CEES)		
Final assessment of performance in field training (CEES) *	25%	متوسط من (4)
Class Observation (Mid-Final)	24%	23
Technological lesson (technology for learning project)	3%	20
Assessment practices	3%	24
Action Research	9%	40
Seminar	2%	5

^{*}The ratio for each task will be calculated by a special equation.

Grading system at Qatar University	
A = 90 - 100	
B+ = 85 - 89.99	
B = 80 - 84.99	
C+=75 - 79.99	

^{*}Note: you must meet these requirements and obtain an average success (intermediate) level or higher in order to achieve a pass mark in the field training, which is C.

C = 70 - 74.99

D + = 65 - 69.99

D = 60 - 64.99

Acknowledgment of adherence to the Handbook
